PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 9+ years of experience building production web applications and business platforms using React, Next.js, Node.js, TypeScript, PHP, PostgreSQL, and AWS.

Experienced in modernizing legacy systems, designing API-driven applications, and improving application performance, with measurable results including up to 80% lower page load times and 45% smaller frontend bundles..

Built AI-powered applications using the OpenAI API for customer support, intelligent Q&A, request classification, and workflow automation.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP

Frontend: React, Next.js, Angular

Backend: Node.js, Express.js, REST APIs

Database & Cloud: PostgreSQL, MySQL, AWS

AI: OpenAI API, AI Chatbots

Tools & DevOps: Git/GitHub, Docker, Vercel

EXPERIENCE

SENIOR FULL-STACK DEVELOPER

Cardinal Peak — Lafayette, Colorado
2023 – 2025

- Integrated the Alin AI virtual assistant into BNP Paribas Cardif's digital platform using the OpenAI API, supporting insurance Q&A, customer request classification, and WhatsApp-based service escalation.
- Migrated a legacy WordPress platform to a React/Next.js headless architecture using TypeScript and WordPress REST APIs.
- Reduced page load time from 1.5s to 0.3s (80%) through SSR, code splitting, lazy loading, and CDN caching.
- Reduced frontend bundle size by 45% through code splitting, dynamic imports, and optimized asset delivery, improving Core Web Vitals and SEO.

FULL-STACK DEVELOPER

Built By Web — Denver, Colorado

2021 – 2023

- Developed and optimized a React/Node.js application serving 50,000+ users using PostgreSQL and AWS, improving page load performance by approximately 35%.
- Rebuilt frontend applications using Next.js SSR/ISR, reducing page load time from 0.8s to 0.4s and TTFB from approximately 600ms to under 100ms.
- Contributed to technical decisions, code reviews, testing, deployment, and troubleshooting throughout the development lifecycle.

JUNIOR SOFTWARE DEVELOPER

GOODISET — Houston, Texas
2019 – 2021

- Developed frontend features and supported backend development for web, desktop, and mobile applications.
- Implemented WebP/AVIF image optimization, responsive images, and lazy loading, reducing image payload size by up to 50% and improving LCP.
- Integrated Google Analytics 4 and custom event tracking to analyze user behavior and optimize checkout and conversion funnels.

SOFTWARE DEVELOPER

LassMichDasMachen — Hechingen, Germany
2016 – 2019

- Developed a WordPress-based hotel management CMS using custom PHP/JavaScript modules for rooms, availability, rates, offers, restaurant, spa, and tourism content.
- Built a custom booking engine with REST APIs, API authentication, availability checks, reservations, cancellations, and booking workflow management.
- Integrated multiple payment gateways, multilingual content, SEO plugins, XML sitemaps, structured data, and localized SEO.
- Implemented HTTPS, reCAPTCHA, role-based access control, input validation, and secure payment/API workflows.

EDUCATION

UNIVERSITY OF COLORADO DENVER, DENVER, COLORADO, USA
BACHELOR OF SCIENCE IN COMPUTER SCIENCE
2012 – 2016
